

LANGUAGE & COMMUNICATION SKILLS

The significance of communication is strongly intertwined with the features of the Engineering world. Engineers must be able to communicate effectively and clearly with a wide range of people, including clients, vendors, consumers, clients, and even authorities and many other colleagues from various industries. Knowing a foreign language is advantageous for people working in a foreign setting, whether in a foreign country or with customers from all over the world. Engineers with strong communication skills can confidently present their ideas in presentations, meetings and reports.
