### POST EVENT REPORT

Department	Computer Science and Engineering	
Name of the Event	Soft skills	
Title of the Event	<b>Assertiveness</b>	
Date of the Event	17.09.2019	
Venue & Time	Auditorium	9.30a.m. – 10.30a.m.
Name of the Chief Guest	Prabhakaran Natarajan	
Designation of the Chief Guest	Motivational Speaker from Innovative Learning Technologies.	
No of Participants	88	
Outcome	The main effect of not being assertive is that it leads to low self esteem. If we communicate in a passive manner we are not saying what we really feel or think. This means we can end up agreeing with and fulfilling other people's needs or wants rather than our own.	
Feedback	Assertiveness can help to control stress and anger and improve coping skills. And also, it helps to express ourselves effectively and stand up for our point of view, while also respecting the rights and beliefs of others.

Outcome	Mind power techniques are mental methods for making positive changes in your environment and in your life. Learning to focus the mind improves your concentration ability and enables you to fix your mind and attention on one specific thought or activity and ignore everything else. This is most useful at work, while studying, in creative visualization and in meditation.	
Feedback	Students were very happy for attending this seminar and also conveyed their gratitude to the Management, Principal and the Department
